

EXHIBIT B
FOOD GRADE CORN SPECIFICATIONS
Mansfield, Illinois

All contracted food grade corn must be fit for human consumption.

Corn must be free of any contamination and/or any chemical deemed unsafe by USDA and FDA regulations.

Trucks/trailers used to deliver Food Grade Corn shall not have been used to transport ruminants or ruminant related products.

No grain will be accepted during harvest at moisture above 20%. Grain delivered after harvest season must be 16% or less moisture and will be shrunk to 14.5%. Drying Schedule is subject to change without notice.

Shrink: All corn will be shrunk to 14.5% moisture using a 1.4% shrink factor.
